

RGB event solutions

## ABOUT US

RGB Baltic is an Estonian event technical production company.

We offer rental of sound, light, video, power distribution equipment and temporary structures, accompanied by full range of technical and creative services.

Our portfolio includes several high profile events: Judo World Championships, Lennart Meri conference, Jazzkaar festival, Leigo Lake Music Festival, Estonian pavillion at Shanghai Expo, Tallinn Old Town Days, NATO foreign ministries summit, Estonian largest festival Õllesummer and many more.

We use modern equipment from internationally recognized manufacturers and guarantee high level of competence in various fields of entertainment technology.

RGB Baltic is member of Estonian Chamber of Commerce.

## SERVICES

### ***Technical Production***

RGB offers full-scale technical production for events.

The main components of our activities are equipment rental and specialist services for:

- sound reinforcement
- screen rental and visual content production
- lighting design and effect lighting
- stages and tribunes

Power distribution solutions and temporary event structures are also parts of our competence.

Get in touch with one of our project managers and you will have an experienced specialist who helps to plan your production.

### ***Video Production***

RGB's video equipment rental department works in collaboration with our video content production team, who's responsibility is creating visual content for the screens.

Our video production employs creative and open minded people. Their aim is to convert clients ideas into real visual content, such as presentations, interviews, animations, screen graphics and video clips.

We also produce live picture together with editing and post-production services.

# RENT

## Sound

Sound reinforcement is the field at which our company has longest history of service. Our extensive sound equipment inventory and experienced technicians allow sound services to be offered also for the most complex and demanding events.

RGB is member of d&b Audiotechnik rental network and we own a J-series line-array system which we use for our larger productions. We also have Martin Audio, Turbosound and QSC loudspeakers; a variety of widely approved consoles, microphones, monitors, backline equipment, DJ equipment and wireless microphone systems.

## Lighting

Our lighting inventory includes most of the elements that are needed for contemporary show lighting and lighting design from PAR can projectors to intelligent moving light fixtures. The choice and quality of our equipment and the devotion of our lighting services team has helped us to become one of the preferred service providers in the field.

## Video

Screens, live picture and screen graphics are core components of contemporary event production.

RGB is the largest video equipment rental and production provider in The Baltic States. We employ top brains of the field and rent video and presentation equipment from respected manufacturers:

- plasma and LCD displays from 17 to 65 inches;
- projection screens in 4:3, 16:9 and 3:1 formats;
- video projectors, including FullHD projectors;
- led screens;
- cameras and equipment for recording and mixing video;
- converters, dividers, splitters etc.

## Truss & Rigging

Aluminum truss in various shapes and sizes is available from us for building stage constructions and bridges for lighting equipment.

We also offer lifting hoists and riggers who take care of safe suspension of equipment at your venue.

## Power Distribution

Every large production needs electrical power for a number of different users. RGB offers safe and reliable distribution of electricity also for the largest scale events.

Our power distribution inventory includes 220V, 16A, 32A, 63 and 125A CEE cables, Powercon and CEE feeded power distribution boxes and a choice of indoor and outdoor cable covers.

### **Stages and Tribunes**

RGB rents modules for building stages and tribunes. In addition to standard 2x1m stage modules, smaller panels are available.

### **Tents and Event Furniture**

Despite tents and event furniture are not the core products of our company, our customers often prefer our project managers to organize also these elements of the production. This is because of our ability to foresee the requirements, knowledge about available options in the market and experience of managing the work of sub-contractors.

### **Dry Hire**

Dry rent means that our customers have a chance to rent equipment from us for personal use. This allows the equipment needs of smaller happenings to be catered without spending on additional services and transportation. Most popular articles of dry rent are loudspeakers, DJ equipment and lighting effects. Please contact our warehouse for information about equipment availability and rental conditions.

### **Long Term Rent**

Long term rent is intended for night clubs and other customers that need equipment for extended periods of time. Users of the long term rental service get a complete technical solution that has been designed by specialists, without having to make considerable investments in buying the system components. Long term rental is usually complemented by periodical maintenance service that guarantees flawless operation of the system through-out the rental period. Another advantage of the service is immediate substitution of equipment in case a malfunction should happen.

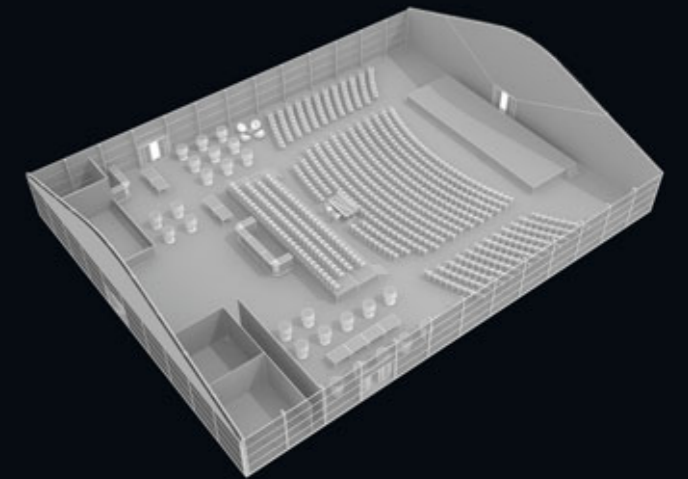

### **RGB Arena**

RGB Arena is a unique structure that provides ideal venue for conferences, exhibitions, receptions, corporate, media and music events.

The pavillion has curved roof and stylish glass-isopanel facade, which make the structure look more like a permanent building. Arena can be equipped with floor, ventilation, heating solutions and walkways. With homebase in Tallinn, Estonia, the structure is available for rent for events across Europe.

Go to [www.rgbarena.com](http://www.rgbarena.com) for more information.

## **AUDIOVISUAL EQUIPMENT SALES**

As daily users of professional sound, light and video gear, we have accumulated invaluable knowledge of how to plan and realize audiovisual installations that really satisfy the needs of our clients.

Our experiences are available for customers who wish to purchase equipment. We believe in long term customer relationships and trade at realistic prices. Maintenance and spares are available for everything that we sell.
